PROFESSIONAL SUMMARY

Software Engineer with **4.5+ years of experience** building production web applications and digital products across enterprise and startup environments. Combines **3.5+ years at Infosys** with end-to-end product and technology ownership at **TRIYARA**, a B2B import-export platform. Strong in **React.js, Next.js, TypeScript, frontend architecture, API integration, authentication and authorization, database-driven applications, performance optimization, SEO, and scalable product design**, with experience taking products from requirements and technical planning through implementation, deployment, and iteration.

TECHNICAL SKILLS

Frontend: React.js, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Material UI

State & Data: Redux, TanStack Query, REST APIs, API Integration, Server-State Management

Backend & Databases: Node.js, Express.js, PostgreSQL, MySQL, MongoDB, Prisma ORM

Architecture: SSR, SSG, ISR, Server Components, Client Components, Authentication, Authorization, RBAC, CASL, Multi-Tenancy, Caching, Database Indexing, API Design

Cloud & Engineering: Vercel, AWS S3, Docker, Git, GitHub, GitHub Actions, CI/CD, Postman, JIRA

Quality & Analytics: Jest, React Testing Library, Google Tag Manager, GA4, Microsoft Clarity, Lighthouse, Core Web Vitals

PROFESSIONAL EXPERIENCE

Founder & Technology Lead | Jun 2025 – Present

TRIYARA EXPORTS

- Own the **end-to-end technology and digital product development** of a B2B import-export platform, spanning requirements, technical planning, architecture, implementation, deployment, and product evolution.
- Architected and built a **static-first, SEO-focused Next.js platform** using React and TypeScript, implementing product and country landing pages, metadata, structured data, sitemap generation, robots configuration, and RFQ/contact workflows.
- Improved web performance from a **Lighthouse Performance score of 85 to 99** and reduced **LCP from 4.2s to 1.0s** through image optimization, performance analysis, rendering strategy improvements, and Vercel CDN-based deployment.
- Built **buyer and supplier onboarding and role-specific dashboards**; implemented authentication, CASL-based authorization, organization-scoped multi-tenant access, PostgreSQL with Prisma, Zod validation, and TanStack Query.
- Designed reusable layers for **API routes, business logic, authorization, and data access**; integrated AWS S3 for document workflows, transactional email delivery, and CI checks.
- Designed modular **export costing and pricing utilities** covering freight, insurance, costing, and pricing, enabling new business tools without tightly coupling them to the core platform.
- Defined product and technical direction for a **B2B marketplace**, including supplier discovery, listings, search/filtering, supplier profiles, buyer requirements, RFQs, lead management, dashboards, and communication workflows.
- Evaluated scaling strategies around **caching, database indexing, connection management, rate limiting, asynchronous processing, read replicas, and load testing** using a bottleneck-driven approach.

Software Development Engineer – Frontend | Apr 2022 – Jun 2025

INFOSYS

- Developed and maintained production web applications using **React.js, JavaScript, HTML5, and CSS3**, following reusable component and modular architecture principles.
- Built responsive user interfaces and integrated applications with **REST APIs and backend services**, handling state, validation, asynchronous interactions, and end-user workflows.
- Contributed across the software development lifecycle, including **requirement analysis, development, testing, debugging, code reviews, defect resolution, and production issue analysis**.
- Collaborated with developers, QA engineers, designers, and business stakeholders to deliver maintainable, user-focused features and support reliable releases.
- Improved application quality and frontend performance through **component optimization, efficient rendering, debugging, Git-based workflows, JIRA, Postman, and CI/CD practices**.

EDUCATION

Bachelor of Engineering (B.E.) | Nagpur University | 2020

CORE STRENGTHS

Frontend Architecture • Product Engineering • Technical Planning • API Integration • Authentication & Authorization • Multi-Tenant Applications • Performance Optimization • Technical SEO • Scalable Application Design • End-to-End Product Ownership
